

Anti-Pathogen and Ultimate pH Balancer

Why it Works The active ingredient in *pH Cleanse* is 5% sodium chlorite (NAClO₂) not to be confused with table salt. It is a powerful antifungal which also kills bacteria, viruses and parasites. *pH Cleanse* also raises pH levels in the body which raises oxygen levels. It has been well-understood for many years that cancer, fungi, parasites, and the like thrive in a low pH environment; therefore increasing your pH may prove to be very beneficial to your health. In addition, *pH Cleanse* boosts the immune system by causing the white blood cells to release cytokines which trigger the immune system to produce natural powerful oxidants such as hydrogen peroxide. The oxidants kill pathogens (fungi, virus, bacteria and parasites) by stripping electrons from their atoms and molecules.

The active ingredient in *pH Cleanse* has been used for decades in the process of cleaning water in municipal water treatment facilities. It's also been used for many years by food companies in the process of killing and preventing fungi on fruits and vegetables and bacteria on meat, fish and poultry. Dentists use it as a tooth whitening agent. It's been used for almost 90 years as a dietary supplement and was grandfathered in as a supplement by the FDA in 1994.

The *pH Cleanse* manufacturing process is truly proprietary and unique. This is a product that has been evaluated by Universities, MD's, and independent laboratories beginning more than thirty years ago. We have posted some of this research that was done for the manufacturer of *pH Cleanse*. Reading the remarkable findings of these researchers makes many people wonder why they didn't find out about this amazing product sooner. The documents have been reproduced with the *pH Cleanse* name in place of the manufacturer's name at the manufacturer's request.

Because of the power of *pH Cleanse* you should not start too fast. Read the suggestions on the brochure because taking too much *pH Cleanse* too fast can result in nausea, diarrhea, or dye-off effects.

Caution!!!

Do not use undiluted-pH Cleanse will burn mouth and skin if not diluted!!!!

Suggested Use

As a dietary supplement

Take one drop of pH Cleanse per twenty pounds of body weight one to three times a day preferably an hour or so after meals and vitamins. Mix in 4 to 6 ounces of water.

As a detoxifier

Start out with one drop of pH Cleanse per twenty pounds of body weight once per day for the first week, twice a day on the second week and three times a day on the third week. Then SLOWLY increase the number of drops you take every day until you feel like you've achieved your desired results. Please remember to increase your drops GRADUALLY to avoid nausea and diarrhea. If you feel cold or flu-like symptoms while you are detoxifying, reduce the number of drops and begin increasing again slowly as you feel able. Always remember to use an hour or so after food and in 4 to 6 ounces of water. Be sure to drink plenty of water when detoxifying.

Colds, sore throat, E. Coli, salmonella

Take 3 to 5 drops per hour or more depending on body weight and current state of immune system, until symptoms subside. Then consider using detoxifier method with pH Cleanse until you feel well again.

Staph infections

Use the detoxifier method as quickly as possible. For topical infections also use pH Cleanse Topical Spray.

Acne/Rosacea

Use detoxifier method and pH Cleanse Topical Spray.

Dental Hygiene

Oral bacteria leads to the growth of dental plaque which in turn leads to periodontitis, gingivitis, and cavities. Mix one teaspoon in 8 ounces of water. Use to brush teeth and retain in mouth for 2 minutes. This will keep oral bacteria to a minimum.

I have been on pH Cleanse for six months now. Over that six month period I have ceased taking any sinus pills, which I had taken daily for 26 years. I have lost 25 pounds and have maintained my weight without dieting whatsoever and my insomnia has completely gone away. I feel energized, calm and healthy.

I am writing to thank you for your pH Cleanse Spray. I have tried other topical products for my eczema but it would take a long time to heal. I have had an ugly patch of eczema on my leg for months. I ordered your spray and within two days I saw such improvement and now 5 weeks later the eczema on my leg is gone. I now wear whatever I want, not just long pants. Hooray!!

Sandra Vega

After 3 weeks on the pH Cleanse I could move my fingers without pain from the stiffness and swelling caused by arthritis. Now after 12 weeks the pain and stiffness is gone. My Stomach problems have disappeared. No more heartburn, bloated stomach and my body is digesting my food again as it did when I was younger. Now at 70 I can say I have renewed energy and feel great. Thanks for telling me about pH Cleanse.
